

From Y3Y4 Class...

Science...

As it is International Year of soil we are studying soil. Did you know that soil is made from rock? Geologists study rocks. We each brought along some really interesting rocks and soil samples to

study. Being soil scientists has been fun!

Mrs Beck came and we tested the pH of some soil. We all had a turn at using the probe to collect soil samples.

Visual Arts...
Pumpkin sketching.

Cooking...

Every Monday morning three students take turns to do cooking with Shannon and Mrs Jones.

We all enjoy tasting the products, learning about procedures and practising Getting Along skills.

People who have their turn last will need resilience skills!
